

Abstract of the Disclosure

An interactive user-interface for ordering specific calculated and
5 solution-oriented results related to finance is provided within a software
suite for enabling viewing and manipulation of multiple categories of
aggregated data compiled from a plurality of data sources and accessible
through a single interfacing node operated on a data-packet-network. The
interactive user interface comprises, an interactive drop-down menu
10 containing a plurality of questions, the questions relating to various aspects
of financial planning, an interactive inputs section containing a plurality of
input data fields and selection boxes, the inputs section for configuring a
calculative order, a submission function for submitting the calculative order
upon completion thereof and a results window for displaying the data results
15 derived from the calculations ordered. A user operating within the user-
interface selects an issue from the drop-down menu, populates any vacant
data fields and or selection boxes displayed in the inputs section as a result of
selecting an issue, and submits the data for server-side calculation and
subsequent display of the calculated results.
